

Silvia Forlati is born in Verona, Italy in 1970 and graduated from IUAV cum laude in 1996 and from the Berlage Institute Amsterdam in 1998. After working for Venhoven C.S.in Amsterdam she joined Zaha Hadid Architects in 1998. She is currently representing Zaha Hadid Architects in Singapore. She married Thomas Lettner in Verona in 2000.

Thomas Lettner is born in Klagenfurt, Austria in 1968 and graduated from the Technical University in Graz in 1997 and from the Berlage Institute Amsterdam in 1999. Since then he is working for Foster and Partners London and in 2001 he was sent to Singapore to set up the regional office. Married Silvia Forlati in 2000.

Hannes Buerger is born in Klagenfurt, Austria 1968 and graduated from the Technical University Vienna in 2000. His son Florian was born in 1991. Hannes was involved in project realizations in various architecture offices in Austria. Currently he is Project architect at Frankl & Partner in Vienna.

The collaboration was founded in Venice 2000 at New Year Eve. It is still a very young enterprise, with a variety of project experiences ranging from realisations to competitions and research work crosscutting all scales. All SHARE projects are knowledge work and based on expertise, fun and dedication.

[when] a time diagram.
 [what] projects need to be there because they show something of our (notyetthere) philosophy/approach. From large to small. World map. Is it our skills?
 Flexibility/ Fun/ Nomadic/ Cityoriented/ Openconfiguration>collaborative/
 Vision:
 + creation of a base/
 + reinforce the network/collaboration
 +finance own research
 + planning> research urban (architecture is not there without the city/ explore the context).
 +deadlines
 +light design. Maximize the circumstances.
 What is our agenda:(learn to hide it).
 It need to be simple (but sometime complicated)
 It needs to be open ended: new uses of possibilities are integrated (reconfiguration allowed/ interference).
 The control of the process/ professionalism of the architect.
 It needs to maximize the circumstances.
 [scale]Scale comes after the idea.
 [beauty]
 [share] as in urban share. Share architecture. Practice. Collaborative base, shared knowledge.Process with the client.
 [field] what is our field
 [site analysis]
 [process management]
 [dreams catching]
 dreams of the client/ sell ours dreams
 [in>difference]
 architecture organizes space. Space is one of the main variable in the equation where the total is our well being. In its lacks it makes life impossible (for example lack of proper sanitation, etc.), in its functionality and flexibility it gives us more space, in its beauty it opens up our minds.
